

[Amend Claim 3 as follows:]

3. (Amended) A rotary electric apparatus as recited in claim 1, characterized in that; the first and said second elements are placed within a casing, the first element comprises a rotor supported for rotation with the casing, said second element comprising a stator is fixed to said casing, and an encoder for acquiring control signals is provided on the inside of said casing.

[Amend Claim 4 as follows:]

4. (Amended) A rotary electric apparatus as recited in claim 1, further including outlet wires constituted as stranded wires associated with the magnet wires.

REMARKS

The claims in this application have been amended to bring them into conformity with the practice of the Rules in this country. The attachment shows the nature of the amendments.

Respectfully submitted,
